ABOUT US

Parrikrama Solutions Private Limited was started with the idea of supplying clean and efficient solutions to its clients. Parrikrama management team with experience of more than 15 years in Solar Industry and experience of setting up number of projects in India & Tanzania in various capacities. Parrikrama Solutions has expertise in solar technology and eco-friendly solutions of converting the cleanest form of energy and supplying power. Our ventures & associations include widely recognized experts in renewable industry, solar finance & forecasting, with a successful track record in developing business in the energy sector.

Our in-house team of solar experts, design and customize the solar projects to get maximum output even in less space which is not only cost effective but also profitable for the clients. We, Parrikrama Solutions have developed a good network of vendors to reduce installation time and cost of solar power projects. A professional approach to various authorities has helped us achieving fast paced installation and commissioning process.

Parrikrama Solutions has built its reputation as a reliable partner in providing clients a reliable solution through solar projects that are suitable for their energy needs. Projects are designed and implemented to meet the applications and energy demands of clients be it residential, industrial or commercial. Parrikrama Solutions has successfully changed the way clients think about renewable energy, as many are looking towards solar projects as long-term investment and a service towards the environment; this is one of the reason for our clients to recommend us.

OUR SERVICES

SOLAR EPC

Now going solar is easier and hassle-free with Parikrama Solutions Private Limited. We are providing complete end to end solutions like analysis of client power consumption and thorough site surveys which will cover - space availability, weather monitoring, structural designing, power generation capacity and engineering the design. We have an in-house team which helps in lowering the cost of projects by proper engineering & research. Tailor-made installations & commercially viable solutions are developed for each individual client. Parikrama has a strong network of pan India, manufacturers & vendors, which turns this difficult process into a much simpler one. An in-house execution & operations support team with immense knowledge and expertise facilitates the proper completion of assignments prior to the time-lined commercial operating date.

OPERATIONS & MAINTENANCE CONTRACTS

Solar projects are a long-term investment with high returns if done properly. Parikrama Solutions Private Limited provides complete maintenance solutions for your solar installations, so that you can maximise output followed by profits. In operations & maintenance process of the project, Parikrama Solutions continuously focuses on efficiency improvement. Our advanced in-house operations and maintenance capability supported with our efficient maintenance guidelines, allows us to increase generation of power and monitor real-time project performance. We believe that our efforts to reduce downtime of project are resulting earlier payback for the system.

FINANCE SOLUTIONS

Parikrama Solutions Private Limited stands out for acquiring finance for small and large solar projects. After working out the total financial requirement, Parikrama Solutions, through its network with investing agencies/individuals and other financial institutions helps in availing the funds for the projects. Parikrama Solutions is associated with different types of financial institutions/banks various suitable finance options are available as per requirement & suitable project size. Customized proposals are also worked out to match client's requirements and maximise the benefits while keeping quality in mind. Parikrama Solutions offers finance options like loans from bankers, private investors for CAPEX model, differed payment, Opex (Resco) model with different PPA timelines.

OUR SERVICES

PROJECT MANAGEMENT & CONSULTANCY

If you are thinking of going solar? avail the expertise of Parikrama Solutions Private Limited, a team of solar & energy experts, ready to provide you with the best profitability in solar & energy solutions. With our knowledge of the renewable energy industry, we, along with our dedicated team of energy experts are able to deliver high quality, reliable and cost-effective projects through our consultancy services. Parikrama Solutions has a proven track record of implementation solar rooftops in various sectors including residential, industrial as well as commercial. We also assist in development of utility scale solar parks through our principals. Here we offer off-takers, on a turn-key basis, in the areas of engineering, operational research, material selection, vendor finalisation, approvals & permissions with concerned authorities, land collection for utility scale solar parks, legal support & all other allied services.

CARBON & WATER CREDIT MANAGEMENT

Carbon Credits are a tradable certificate that proves that a company or an environmental project has avoided the emission or absorbed the emission of 1 tonne of CO₂ or equivalent greenhouse gas in a given year.

e.g. Solar, Wind Energy, Forestry, Biomass, Waste Handling etc.

As an Eco-Investor, you are a part of the global Green Economy and it creates an incredible impact on Climate change Mitigation. For this kind of sustainable energy production project, you are eligible to claim Carbon Credit under the UNFCCC's (United Nations Framework Convention on Climate Change) Voluntary market mechanisms.

Parikrama Solutions Pvt. Ltd. being the channel partner for Climekare Sustainability Pvt. Ltd. helps its clients work towards becoming carbon neutral.

HOW WE WORK

1

A proper site survey is done to understand the client requirements and check feasibility of the proposed solar system

2

Using the data collected during the site survey, a detailed shadow analysis and system feasibility report is generated by the best solar software.

3

Once the report is generated, a complete Techno-Commercial proposal is shared with the client for approval.

4

On approval of the proposal, fabrication team surveys the site for structure finalisation, positions of the earth pits etc.

5

On finalisation, a formal PO is received from the client and the work is started, applications to MSEDCL/ DISCOM are done online and work is started.

6

On approval of online applications from MSEDCL/DISCOM the Net Metering process is started.

CARBON CREDITS & HOW IT WORKS?

1

Identify the project activity and analyse the project as per UNFCCC guidelines

2

Post eligibility analysis, we sign a detailed service agreement with the client, based on agreed payment and service terms.

3

Third Party GHG auditors appointed by the registry validates the work done by us, according to the methodologies.

4

The GHG Auditor generates the final audit opinion and requests the registry to issue Carbon Credits to the project proponent.

Carbon Neutrality

Carbon Neutrality or having a net zero carbon footprint refers to achieving net zero carbon emissions by balancing measured amount of carbon released with an equivalent amount sequestered or offset.

MEET THE TEAM

Ketann Kilpadi
Director-Operations

Ketann Kilpadi comes with a good 25 years plus of experience in the field of marketing and sales, heads the sales, procurement, business development and project implementation.

Viira Kilpadi
Director-Finance

Viira Kilpadi comes with a vast experience in accounts and finance, a professional Accountant with 25 years plus of experience in the field is the Director of Finance.

Maj. Ravindra Vichare (Retd.)
Technical Advisor

Major Ravindra Vichare (Retd), backs Parikrama with his vast knowledge in the field of solar and renewable energy, his knowledge extends from Solar, Wind to Carbon Credits etc.

WARRIORS

The Team that provides the on-site support needed for a good and successful installation & a satisfied customer.

OUR PROJECTS

RESIDENTIAL KASTURI EPITOME

EPITOME - Residential Housing Society in Wakad, Pune.
System size - 62.5kW rooftop with Net Metering.

INDUSTRIAL DESAI FOODS PVT. LTD.

DESAI FOODS - Food Industry in Bhore, Pune.
System size - 393kW rooftop with Net Metering and DG Synchronisation

COMMERCIAL SHELL PETROLEUM

SHELL - Petrol stations in various areas of Ahmedabad, Gujarat.
System size - 10kW with zero export/ Captive.

Schools

ZPPS (MH) - State funded schools
System size - 1kW with Net Metering
